Organic caramel mild does not contain genetically modified organisms and is not produced using raw materials of a genetically modified origin. At no stage during production does the product come into contact with genetically modified organisms.

4. STORAGE CONDITIONS

Storage conditions	<p>Store in a clean and dry place at ambient temperature (about 15-20°C) in closed original packaging. Caramel, which has been stored at low temperature (less than 15°C), is liable to crystallize. Crystallization is not a deterioration of caramel, it is reversible by warming.</p> <p>All caramel colours have a tendency to get darker over time. After prolonged storage the caramel colour can still be used but the addition level should be adjusted accordingly. We recommend storage at 20°C to maintain colour and viscosity stability. Viscosity can change with the temperature (caramel has a high viscosity at low</p>
