GENERAL ALLERGEN STATEMENT:

Nielsen-Massey Vanillas maintains a strict allergen control program to carefully exclude all major food allergens defined by FALCPA, the Food Allergen Labeling and Consumer Protection Act of 2003.

Our program has three pillars:

- 1. Careful selection of suppliers/manufacturers of ingredients:** Our ingredients are the highest quality producers can provide to us. We require reliable information about any risks involving allergens in raw materials. See the chart below for details.
- 2. Eliminating cross contamination risks:** Incoming inspection is key to preventing unintentional sources of allergens from entering the plant by shipping contamination. Our personnel carefully inspect trucks and packages to prevent unknown or unclean materials from entering the plant.
- 3. Maintenance of a dedicated plant:** NMV operates a dedicated facility which does not process any material containing common allergens. This virtually eliminates the risk of processing cross contamination in our operation. Contingency and secondary manufacturing facilities may have allergens on-site which are included in the chart below.

LOT CODE DESCRIPTION:

Nielsen-Massey Vanillas lot code, i.e., 27864, is a numeric code placed on each product label at the time of production. It is directly related to a unique worksheet that is used to produce the specific product. These worksheets are sequentially numbered and provide procedures and material lots used to produce this product.

For industrial products, code dating is indicated by a Manufacture date month and year, i.e. Feb 2017, on the case. For retail products/food service, code dating is indicated by a Best By month and year, i.e. Feb 2017, on the bottle.
